

PROFESSIONAL SUMMARY

Highly motivated **Computer Science Engineering** student with solid foundations in **Software Engineering**, **Object-Oriented Programming**, and **Full Stack Development**. Proficient in **Java**, Python, Django, and SQL, with hands-on experience building secure **REST APIs** and managing databases using Git for version control under **Agile** methodologies. Eager to continuously learn and adapt to **enterprise applications** (including React, SAP UI5, and SAP ABAP) to build and deploy robust, cloud-integrated business systems.

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript (ES6+), SQL, C++, HTML, CSS
Frontend Development:	React (Learning), Bootstrap 5, AJAX, Responsive Design
Backend Development:	Django, Django REST Framework, REST APIs, Authentication
Database Management:	SQLite, PostgreSQL, Firebase Realtime Database, Database Design
Developer Tools:	Git, GitHub, VS Code, Render, Android Studio, Jupyter Notebook, Google Colab
CS Fundamentals:	Data Structures, Algorithms, DBMS, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Software Engineering

PROJECTS

BlueCart — Full Stack E-Commerce Web Application <i>Django, SQLite, Python, Bootstrap 5, ReportLab, REST APIs, Render, Git</i> - Engineered a modular Software Engineering architecture with Django; implemented secure user authentication, form validation, and responsive design. - Designed normalized SQLite database models and optimized transactions using row-level locking (select_for_update) to handle concurrent checkouts. - Implemented API Integration for automated invoice downloads via dynamic ReportLab PDF rendering, configuring cloud deployment on Render using version control.	2026
Funsta — Full Stack Social Media Platform <i>Django, PostgreSQL, Python, Bootstrap 5, AJAX, REST APIs, Render, Git</i> - Developed a production-ready social media platform with complex database relationships supporting carousel media posts and follow dynamics. - Implemented asynchronous AJAX Fetch integrations (likes, comment nesting) and verified secure session authentication workflows. - Mapped backend REST API endpoints and deployed the system to Render integrated with a managed PostgreSQL cloud database.	2026
Poultry Farm Management System <i>Android Studio, Kotlin, Firebase Realtime Database, Android SDK, Git</i> - Developed a native Android mobile application to digitize paper logs for operations; achieved instant cloud synchronization using Firebase. - Built reactive mobile UI components supporting CRUD operations and automated push notifications for critical operator threshold alerts. - Executed comprehensive testing and debugging of data flows to verify synchronization consistency under variable network conditions.	2025

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Design and Analysis of Algorithms

PROFESSIONAL SKILLS

Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Continuous Learning, Time Management, Critical Thinking, Ownership, Fast Learner

EDUCATION

Canara Engineering College Bachelor of Engineering (B.E.) — Computer Science & Engineering (Data Science & AI/ML)	Mangaluru, Karnataka 2023 — 2027 (Expected)
Canara PU College Pre-University Course (Computers & Electronics)	Mangaluru, Karnataka 2021 — 2023

CERTIFICATIONS

- Java Programming — Infosys Springboard
 - C Programming — Spoken Tutorial, IIT Bombay
- Prompt Engineering — Infosys Springboard
