

PROFESSIONAL SUMMARY

A driven **Computer Science Engineering** student specializing in **Data Science**, **AI**, and **Machine Learning**, with a strong foundation in **Full Stack Development**, **Backend Development**, and **Frontend Development**. Proficient in **Python**, **Django**, and **Java**, with hands-on experience applying **Software Engineering** methodologies to build secure, scalable web and mobile systems. A proactive **problem solving** enthusiast dedicated to **continuous learning** and creating efficient **software development** solutions.

TECHNICAL SKILLS

Languages:	Python, Java, C++, JavaScript (ES6+), SQL, HTML, CSS
Frameworks:	Django, Django REST Framework, AJAX, REST APIs, Bootstrap 5, Firebase SDK
Databases:	SQLite, PostgreSQL, Firebase Realtime Database, Database Design
Libraries:	NumPy, Pandas, Matplotlib, Seaborn, Pillow, ReportLab, Machine Learning libraries
Tools & Methods:	Git, GitHub, VS Code, Render, Android Studio, Android Development, Responsive Web Design, Jupyter Notebook, Google Colab
Core Subjects:	Data Structures, Algorithms, DBMS, Object-Oriented Programming (OOP), Software Engineering, Operating Systems, Computer Networks

PROJECTS

BlueCart — Full Stack E-Commerce Web Application <i>Django, SQLite, Python, Bootstrap 5, ReportLab, REST APIs, Render</i> - Engineered a modular, full-stack architecture using Django, implementing custom user authentication and a responsive layout with Bootstrap. - Optimized transactional operations using Django's atomic transactions (<code>transaction.atomic</code>) and row-level locking (<code>select_for_update</code>) to handle concurrent checkouts. - Developed an automated receipt generator using ReportLab to dynamically produce vector-based PDF invoices upon checkout.	2026
Funsta — Full Stack Social Media Platform <i>Django, PostgreSQL, Python, Bootstrap 5, AJAX, REST APIs, Render</i> - Developed a production-ready social media platform with multi-image carousel posts, Caption parsing (hashtags/mentions), and infinite feeds. - Built asynchronous, zero-page-reload elements (likes, comment nesting, notifications) using JavaScript and AJAX Fetch requests. - Normalized database schemas mapping complex user connections and deployed the application to Render integrated with PostgreSQL.	2026
Poultry Farm Management System <i>Android Studio, Kotlin, Firebase Realtime Database, Android Development, Android SDK</i> - Developed a native Android mobile application to digitize paper logs for poultry operations, reducing administrative overhead by 40%. - Integrated Firebase Realtime Database to achieve instantaneous cloud synchronization of daily feed logs and bird weight metrics.	2025

EDUCATION

Canara Engineering College Bachelor of Engineering (B.E.) — Computer Science & Engineering (Data Science & AI/ML)	Mangaluru, Karnataka 2023 — 2027 (Expected)
Canara PU College Pre-University Course (Computers & Electronics)	Mangaluru, Karnataka 2021 — 2023

CERTIFICATIONS

- Java Programming — Infosys Springboard
 - C Programming — Spoken Tutorial, IIT Bombay
- Prompt Engineering — Infosys Springboard
